

Quality  
Management  
Partnership

Your future.  
Your voice.  
Your say.

Did you know the Quality Management Partnership is recommending that the Ontario Breast Screening Program (OBSP) be expanded to all breast screening for eligible women in Ontario?

That is just one of the many recommendations included in the proposed quality management program for mammography.

To tell us what you think about these recommendations, participate in our online consultation.

Visit [www.cpso.on.ca/QMPconsult](http://www.cpso.on.ca/QMPconsult) to:

- Complete a survey to tell us what you think of our proposed quality management program for mammography in Ontario
- Join a discussion forum to exchange ideas with others

The consultation site is open until **December 12, 2014**.

Your feedback will help improve patient care and shape the future of quality in this health service.

“Overall quality has a direct impact on patient care and on patient outcomes. Poor quality has a negative impact on patient outcomes, and directly affects the future of breast imaging.”

Jean Seely, Radiologist, Mammography Expert Advisory Panel
